

DESIGNERS  FAVORITES  
UNIQUE HANDMADE JEWELRY

LET THE FAIRY TALE BEGIN WITH MAGICAL JEWELRY!

### **The Brand**

Designers Favorites is a Danish jewelry brand that was formed by a group of creative designers. This collection is a combination of their favorite work.

### **The Jewelry design**

The designs of this jewelry are different from the norm. They have a touch of nature and fairy tale and have many small exquisite details, varying from simple one-stone jewelry to complex creations with several stones. This wonderful collection will make every woman who wears them feel special.

### **The material**

All the pieces are made from Sterling Silver 925 with the use of 18K gold plating, white or black rhodium. We use freshwater pearls and different kinds of stones such as Amethyst, Peridot, Tourmaline etc. Some of the rings have an opening to fit different sized fingers. Read more details about each jewelry in this catalogue or ask your local goldsmith.

### **Retailers**

Designers Favorites are available in more than 100 shops in Europe. See them, try them, buy them and fall in love with them at your local shop.

We hope that you will enjoy the next pages and hopefully be inspired by the Designers Favorite Jewelry.

All the best from Designers Favorites.

# The Deeper Beauty

by Sophie Vallentin

Sophie Vallentin, who designed the collection "The Deeper Beauty" is a Danish prize winning artist with a passion for color, natural beauty and playful motives. Her work is sensual, whimsical and expressive.

For the Deeper Beauty Sophie was inspired by the ocean and all its treasures.

Sophie describes her collection as a story from the ocean with a diverse range of organic forms and captivating mythology to increase peoples awareness of its beauty and fragility.

## LARIMAR

THE UNIQUE BRIGHT BLUE VARIETY OF LARIMAR IS FOUND ONLY IN THE DOMINICAN REPUBLIC. IT WAS ONLY DISCOVERED IN 1916, AND ONLY GIVEN ITS NAME IN 1974. MIGUEL, WHO FOUND THE LARIMAR, NAMED IT AFTER HIS DAUGHTER LARISSA AND THE SPANISH WORD FOR SEA (MAR) TO SUGGEST THE COLORS OF THE CARIBBEAN SEA WHERE IT WAS FOUND.
